## (54) Title: METHOD AND APPARATUS FOR MINIMIZING THE IMPACT OF NETWORK DELAYS

## (57) Abstract

The methods and apparatus of the present invention determine expected network delays and alter program parameters based upon the determined delays. During the implementation of an interactive program, program parameters are adjusted based upon the expected delay and the program is not halted between transmission times. In one embodiment, with reference to computer games, the zone around which a game object is determined to be "hit" is expanded to account for the game object's motion during the delay period. In another embodiment, the effect of the network delay is minimized by not implementing a player's input on the player's computer until a specified time has elapsed.

## INTERNATIONAL SEARCH REPORT

International application No.

PCT/US 96/02348

## A. CLASSIFICATION OF SUBJECT MATTER

IPC6: A63F 9/22

According to International Patent Classification (IPC) or to both national classification and IPC

## B. FIELDS SEARCHED

Minimum documentation searched (classification system followed by classification symbols)

IPC6: A63F, H04Q, G06F

Documentation searched other than minimum documentation to the extent that such documents are included in the fields searched

Electronic data base consulted during the international search (name of data base and, where practicable, search terms used)

EPODOC, PAJ

## C. DOCUMENTS CONSIDERED TO BE RELEVANT

Category*	Citation of document, with indication, where appropriate, of the relevant passages	Relevant to claim No.

 Further documents are listed in the continuation of Box C. See patent family annex.

- \* Special categories of cited documents
- "A" document defining the general state of the art which is not considered to be of particular relevance
- "E" earlier document but published on or after the international filing date
- "L" document which may throw doubts on priority claim(s) or which is cited to establish the publication date of another citation or other special reason (as specified)
- "O" document referring to an oral disclosure, use, exhibition or other means
- "P" document published prior to the international filing date but later than the priority date claimed

- "T" later document published after the international filing date or priority date and not in conflict with the application but cited to understand the principle or theory underlying the invention
- "X" document of particular relevance: the claimed invention cannot be considered novel or cannot be considered to involve an inventive step when the document is taken alone
- "Y" document of particular relevance: the claimed invention cannot be considered to involve an inventive step when the document is combined with one or more other such documents, such combination being obvious to a person skilled in the art
- "&" document member of the same patent family
